

EXTERNAL THREADED FERRITE BASE

Ferrite magnetic bases with external thread are magnets in the shape of a magnetic disk with an external thread or threaded stem at the top of the magnet that allows other elements to be screwed in and improve fixation. It ensures its subjection thanks to the magnetic force provided by the magnet and the fixation provided by the external thread.

Material	Ferrite
Shape	Disk
Diameter (A)	10 - 32 mm*
Thickness (C)	4,5 - 7 mm*
Total height (H)	11,5 - 15 mm*
Metrics (M)	3 - 4*
Tolerance	+/- 0,1 mm*
Magnetisation	Axial*
Quality	Y30BH*
Max. working temperature.	250°C*

*These characteristics can be modified if they are tailor made.

WARNING

The use of permanent magnets is especially contraindicated for people who use pacemakers. Do not bring electronic devices, watches, credit cards, magnetic cards, calculators, precision instruments, or other magnetic materials close together, as this may irreversibly alter or damage their proper functioning.
