

RUBBER COATED POT MAGNETS

The rubber-coated ferrite magnetic bases are made up of ferrite discs encapsulated in iron with a rubber coating, offering added protection, thus preventing possible blows, scratches, stains, humidity and other possible damaging factors.

This type of ferrite magnetic bases, thanks to its fastening system and rubber coating, allow handling and working without damaging any surface.

Material	Ferrite
Shape	Disk
Diameter (A)	43 mm*
Diameter (d2)	8 - 10,5 mm*
Thickness (C)	12,5 mm*
Metrics (M)	5 - 5,5 mm*
Coating	Rubber
Tolerance	+/- 0,1 mm*

*These characteristics can be modified if they are tailor made.

WARNING

The use of permanent magnets is especially contraindicated for people who use pacemakers. Do not bring electronic devices, watches, credit cards, magnetic cards, calculators, precision instruments, or other magnetic materials close together, as this may irreversibly alter or damage their proper functioning.
