

Precision in Magnetics

# Environmental Policy

F-13-008

Review: **02**

**Ingeniería Magnética Aplicada, S.L.U.** as a manufacturer of magnetic products, applications and systems related to the world of magnetisms aimed at all industrial sectors, led by its General Manager, incorporates in its business philosophy the desire to promote respect for the **Environment:**

**I.** Implementing and maintaining an Environmental Management System that **promotes pollution prevention, climate action and international initiatives to achieve global climate goals.**

**II.** Assuming **respect for the environment, pollution prevention and the fight against climate change** by identifying the environmental aspects and impacts generated by the activities and our processes, products and services, mitigating them and reducing their ecological footprint.

**III.** Complying with the **Legal Requirements of the Product, Environmental Management, as well as other requirements subscribed to with customers and stakeholders.**

**IV.** Applying Best Available Techniques (**BATs**) to carry out the activity in the most **environmentally sustainable, energy efficient and economically viable manner.**

**V.** Implementing methodologies for the investigation of accidents and incidents, worker participation, as well as the implementation of **Continuous Improvement in Environmental Management.**

**VI. Promoting awareness and training** in Environmental, Sustainability and Climate Change matters to all our collaborators to achieve business and global objectives.

General Manager

Ricardo Altimira
