

# Certificate

**Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)**

IMA, INGENIERÍA MAGNÉTICA APLICADA S.L.U. manufactures products or provides services where chemicals are not the main element of its business. Consequently, under REACH, IMA is an intermediate user.

Intermediate users play a key role in promoting the safe use of chemicals by implementing their use on their own sites and communicating relevant information to both their suppliers and customers.

Substances considered SVHC (Substances of Very High Concern) are those meeting one of the criteria set out in Article 57 of the REACH Regulation. The [REACH SVHC list](#) is not static and is frequently updated. As of the latest update on November 5, 2025, there are 251 substances on the SVHC candidate list.

These types of substances will be included in **Annex XIV** ([List of substances subject to authorization](#)) and their use is subject to authorization by the ECHA (59 entries in the latest update of November 1, 2023).

EU producers or importers of articles containing substances listed as REACH SVHC at concentrations above 0.1% (w/w) have the following obligations under Article 33.1 of REACH:

***Article 33 Duty to communicate information on substances in articles***

*Any supplier of an article containing a substance meeting the criteria of Article 57 and identified in accordance with Article 59(10) in a concentration above 0.1% by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.*

Additionally, Annex XVII of the REACH regulation contains the list of restrictions on certain substances, mixtures, and articles hazardous for marketing and use within the European market. A restriction may apply to any substance on its own, in a mixture, or in an article, including those not requiring registration. The list is often referred to as the REACH restricted substances list or simply as Annex XVII of REACH.

Currently, there are 78 valid entries in the REACH restricted substances [list included in Annex XVII](#) (latest update December 10, 2025). Each entry shows the substance or group of substances or mixture, and the consequent restriction conditions.

Our obligation is to be aware of the presence of these substances to calculate their concentration levels in our own manufactured products and to inform our customers in accordance with Article 33.2 of REACH.

Medium Chain Chlorinated Paraffins (**MCCPs**) are substances identified as extremely concerning substances that meet the criteria set out in Article 57 of REACH and, since 08/06/2021, must be identified as SVHC and are included in the Candidate List for authorization.

Perfluoroalkyl and polyfluoroalkyl substances (**PFAS**) are hazardous substances regulated by REACH and were included in Annex XVII on 17/01/2023; therefore, compliance with this requirement is included in this REACH certificate. We are aware of the risk that the use or sale of PFAS in the European market may be restricted, but this does not have a significant impact on our production because our products do not contain them.

We certify that, to the best of our current knowledge, **IMA, INGENIERÍA MAGNÉTICA APLICADA S.L.U.** does not intentionally incorporate in its articles any of the chemicals mentioned in the REACH SVHC list in quantities above 0.1% (w/w) as defined in Article 57 of REACH, Annex XIV, Directive 67/548/EEC, and does not incorporate any of the chemicals listed in the restricted substances list as defined in Annex XVII of REACH.
