

# Certificate

## **Regulation (EC) No 1907/2006 of the European Parliament and of the Council of 18 December 2006 concerning the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)**

**IMA, INGENIERÍA MAGNÉTICA APLICADA S.L.U.** manufactured goods or offer services where chemicals are not the main element of their business. So, in terms of REACH, IMA is a downstream user.

Downstream users have a key role to play in advancing the safe use of chemicals by implementing safe use at their own site and communicating relevant information both to their suppliers and their customers.

The substances considered SVHC (Substances of Very High Concern) are those that meet one of the criteria of Article 57 of the REACH Regulation. The [REACH SVHC list](#) is not a static list and is updated frequently. As of January 21<sup>th</sup> 2025, there are 247 substances on the SVHC candidate list.

This type of substance will be included in **Annex XIV** ([List of substances subject to authorization](#)) and its use is subject to authorization by ECHA (59 entries in the last update November 1<sup>st</sup>, 2023).

EU producers or importers of articles which contain substances on the SVHC list in a concentration above 0.1% (w/w) have obligations under Article 33.1 of REACH:

*Article 33 Duty to communicate information on substances in articles*

*1. Any supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(10) in a concentration above 0,1 % weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance.*

In addition, the **Annex XVII of REACH** regulation contains the list of restrictions on certain hazardous substances, mixtures and articles for their marketing and use on the European market. A restriction can apply to any substance on its own, in a mixture or in an article, including those that do not require registration. The list is often known as REACH restricted substances list or simply as REACH Annex XVII.

There are currently 74 valid entries in the latest [list of restricted substances included in Annex XVII](#) of the REACH (last update: November 12, 2024). Each entry shows the substance or group of substances or the mixture, and the consequent restrictions conditions.

Our obligation is to know the presence of these substances to calculate the concentration levels of these in our own manufactured products and, so that we can inform our customers in accordance with article 33.2 of REACH.

Perfluoroalkyl and polyfluoroalkyl substances (**PFAS**) are hazardous substances regulated by REACH which were included in its Annex XVII on 17/01/2023 and therefore compliance with this requirement is included in this REACH certificate. We are aware that there is a risk that the use or sale of PFAS may be restricted in the European market, but this does not represent a significant impact on our production because our products do not contain them.

We certify that, to the best of our knowledge, **IMA, INGENIERÍA MAGNÉTICA APLICADA S.L.** does not intentionally incorporate in our items any of the chemical substances mentioned in the **SVCH list** of REACH in quantities greater than 0.1% (w/w) as defined in Article 57, **Annex XIV** of REACH, Directive 67/548/EEC, and none of the chemical substances included in the restricted substances list as defined in **Annex XVII** of REACH.
